## C. Rose for Guitar

**For Advanced Students**

Single-string studies is an important part of guitar education. Students frequently learn note reading and note placement through playing single-string studies.

This volume is the third in a series of single-string studies intended to assist in improving sight reading and finger placement. After your students have completed the *24 First Position Studies* and the *36 Wohlfahrt Studies*, they will be ready for these *21 Clarinet Studies* by C. Rose.

These studies cover up to five sharps and the three flats, and utilize the full range of the guitar with arpeggio studies and string crossings. These studies may be played with a pick or finger-style.

These studies been tested repeatedly with advanced high school students. The guitar class as a whole will become better at ensemble playing as students extend their playing range and improve sight reading.
