Wohlfahrt for Guitar **For Intermediate and Advanced Students**

Single-string studies is an important part of guitar education. Students frequently learn note reading and note placement through playing single-string studies.

These 36 single-string violin studies have been transcribed for guitar. There are many wide skips which are always challenging on guitar. These studies are great for improving sight reading skills. The tonal range for this collection is a low "G" on the sixth string to a high "B" on the first string, seventh fret. These are ideal for weekly or bi-weekly playing tests.

These may be played with a pick or finger-picking.

These studies have been tested repeatedly with middle school guitar students and intermediate high school students. The guitar class as a whole will become better at sight reading music as students improve their reading skills with these exercises.
